

YES	NO	N/A
-----	----	-----

1 What is the current or prior use of the building? _____

2 What is the proposed use of the building? _____

If there is a change in use, provide details of water demand: average daily demand, instantaneous peak demand, Exhibit #7 (ERU) and other pertinent information.

3 Will the new use require a new water meter?

--	--	--

If yes, provide details and type of the proposed water meter and Exhibit #3.
If no, provide type of existing water meter and Exhibit #3.

4 Will the new use require a new backflow preventor?

--	--	--

If yes, provide details and type of the proposed backflow preventor and provide Exhibit #5.
If no, provide type of the existing backflow preventor and provide Exhibit #5.

5 Is a new or expanded fire sprinkler system proposed for the new use?

--	--	--

If yes, provide hydraulic calculations of the proposed system, Exhibit #8, Owner/Client declaration form delineating responsibility of maintenance of subject fire line and appurtenances (Exhibit #5), and provide detail of the installation of a double detector check valve/reduced pressure zone detector check valve and meter on the fire line.

If no and there is an existing sprinkler system in the building, please provide the size, type and location of the existing backflow device and Exhibit #5.

6 Is an exterior oil/water separator or interceptor proposed for the new use?

--	--	--

If yes, provide a site plan showing the oil/grease separator on the sewer lateral with plans and details of tank size and location.

7 Is a landscape irrigation system proposed for the new use?

--	--	--

If yes, provide plans and specifications for subject irrigation system to include an approved backflow preventor and water meter in accordance with the City of Savannah specifications, and restrain all critical bends and connections and provide Exhibit #5.

8 Did you answer "Yes" to any of questions 5 through 7?

--	--	--

If yes, it is possible that a site permit may be required in addition to the building permit. This permit will address any work to be completed more than five (5) feet outside the building or within the public right-of-way. Please contact the Development Services Department at 912-651-6510 and get your project on the agenda for one of the Site Plan Review meetings. There your project can be discussed and together we can determine the extent of any additional plans that may be required. You may submit plans for the building permit but a permit cannot be issued until the site issues are resolved and a site permit is ready for issuance, if required.

If no, submit this completed questionnaire and all other required documents, exhibits, and plans from questions 1 through 4 along with the other documents required for the building permit for review to the Development Services Department Permitting office.

Copies of all exhibits, forms, guidelines and other related documentation, as applicable, can be obtained from the City of Savannah's Development Services Department or from the City of Savannah's web page at www.savannahga.gov under the "Development Guidelines", Policies and Procedures section.
